## OBJECTIVE

To obtain a summer internship in which I can solve challenging problems in a team setting in order to grow as a developer.

## SKILLS

Languages: Java, Python, and JavaScript
Frameworks: Flask, React, Bootstrap, PyTorch
Tools: Git/GitHub, VSCode, Vim, and Linux
Other: Machine Learning, Data Analysis, and Microsoft Office Suite

## PROJECTS

### STUDY MODE / **PROGRESSIVE WEB APP**
Spring 2020
I built a progressive web app that helped students schedule group study sessions and meet new people. It was created with React, Redux, and Firebase along with Bootstrap CSS for styling.

### AMAZON WISHLIST TRACKER / **WEB SCRAPER**
Summer 2019
I created a Flask web application that tracked prices of items selected by the user and would alert them once they reached a target price set by the user.

## EDUCATION

### B.S. COMPUTER SCIENCE
University of Texas at Austin
Relevant Coursework: Computer Architecture,
Data Structures, Robot Learning, Statistics, and Discrete Math
Expected Graduation Month: May 2023

## EXPERIENCE

### TEACHER / **BERKELEY2 ACADEMY**
February 2020 – Present
I teach college preparation courses such as SAT Math and ACT Math/Science. I also tutor students individually in STEM subjects such as Computer Science, Calculus, and Chemistry.

### ACADEMIC TUTOR / **KUMON OF ROUND ROCK - WEST**
August 2016 – May 2019
I tutored students from kindergarten to high school in math and reading. I also graded, recorded, and planned homework and classwork to reach certain goals set by the lead instructor and parents.
